they could not flourish, Sun is as essential to the best development of our lives as it is to birds or plants. A business friend of mine divides all people into two classes-sheep and wolves. My division is just as sweeping-optimists and pessimists. The optimist lives on the sunny slope-the pessimist in the shadow. Both have a right to live where they choose and both are correct in their view of life, and it is optional with us all which view we

There is a lady I know who never leaves the house when there is a cloud in the sky without her umbrella and rubbers. To be sure, she is never caught unprepared, but think of the trouble of always carrying that umbrella.

The ortimistic person who always thinks that the clouds are going to clear up instead of grow bigger, and accordingly usually leaves her umbrella at home, may get caught occasionally, but I think on the whole she has the best of it.

I stopped to buy a paper from a little newsboy one bitterly cold morning. He had on a pair of gloves very much the worse for wear, and I suggested that his fingers must be cold. "Aw gee, loidy, that ain't nuttin'. My pal ain't got no mits at ail." was his prompt reply.

There is no condition in life so good that it could not be improved, and none so bad that it might not be worse. One thing, however, is certain, that we cannot improve a bad condition

by living in the shadow and discontent of pessimism In these days of "new thought" almost every one admits that what

we think about affects what we are. One of Van Dyke's guide posts on the footpath to peace was to "think

seldom of your enemies, often of your friends, and every day of Christ." If to-morrow you definitely try to think seldom of your troubles and often of the pleasant things that have happened or may happen to you, and to live all day on the sunny slope of your existence, I am pretty sure that the night time will find you in a happier frame of mind than if you had made no such effort.
